Stacks Cheat

Stacks → Layer 2 blockchain → Uses Proof of Transfer
(POX) mining protocol.

Pox blockchain → Runs in parallel to another blockchain
(Bitcoin)

Layer 1 → Ground Level blockchain
  └→ Has its own ledger
  └→ stacks, bitcoin, etherem

Layer 2 → Solana, bitcoin lightning →
  └→ It doesn't have its own ledger

Clarity vs Solidity → Built on etherem
    ↓   ↓
Built on stacks

Clarity	Solidity
↓	↓
→ Turing in complet	→ Turing complete
→ Lower gas fees	→ Higher gas fees
→ Interpreted	→ Compiled
→ No Loops / Recursion	→ Loops / Recursion
→ SIP Standards	→ ERC Standards
↓	
Function should be pure
